Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/846,044

Applicant(s)

SHAH, ATHAR

Examiner

Gregory J. Strimbu

Art Unit

3634

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 June 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3-12 and 14-24 is/are pending in the application.
- 4a) Of the above claim(s) 8-10 and 17-19 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,3-7,11,12,14-16 and 20-24 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Election/Restrictions

Applicant's election of Group I in Paper No. 3 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Accordingly, claims 8-10 and 17-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 4, 7, 11 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osborn et al. in view of Yamamura et al. Osborn et al. discloses a regulator assembly comprising a glass support member 30 for supporting a pane of glass 16, a drive motor 32 producing a drive force for moving the glass support member between open and closed positions, a flexible timing belt 28 having a profile, the belt interconnecting the drive motor and the glass support member, a pulley 134 with a complementary profile to the profile of the flexible belt, the pulley engaging the belt and moving the belt relative thereto in response to the drive force, spaced apart guides (not

Art Unit: 3634

numbered, but seen in figure 1 at the left and right sides of the window opening), and a rod 120 to maintain a distance between opposing portions during installation of the assembly onto a door. Osborn et al. is silent concerning a belt having protrusions.

However, Yamamura et al. discloses a regulator assembly comprising a timing belt having teeth and a sprocket wheel having complementary teeth. See column 11, lines 33-38.

It would have been obvious to one of ordinary skill in the art to provide Osborn et al. with a timing belt, as taught by Yamamura et al., to provide a more reliable means for transmitting force between the motor and the glass support member.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osborn et al. in view of Yamamura et al., as applied to claims 1-4, 7, 11 and 21-23 above, and further in view of Shibata '966. Shibata '966 discloses a regulator assembly comprising pulleys 38 and 40 supported by spaced apart brackets 24 and 28 that include stops.

It would have been obvious to one of ordinary skill in the art to provide Adachi '678 with brackets, as taught by Shibata '966, to more securely mount the regulator assembly to the vehicle door.

Claims 12, 14-16 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osborn et al. in view of Shibata '966. Osborn et al. discloses a regulator assembly comprising a panel 120, a glass support member 30 for supporting a

pane of glass 16, a drive motor 32 producing a drive force for moving the glass support member between open and closed positions, a flexible timing belt 28 having a profile, the belt interconnecting the drive motor and the glass support member, a pulley 134 with a complementary profile to the profile of the flexible belt, the pulley engaging the belt and moving the belt relative thereto in response to the drive force, spaced apart guides (not numbered, but seen in figure 1 at the left and right sides of the window opening). Osborn et al. is silent concerning spaced apart brackets.

However, Shibata '966 discloses a regulator assembly comprising pulleys 38 and 40 supported by spaced apart brackets 24 and 28 that include stops.

It would have been obvious to one of ordinary skill in the art to provide Osborn et al. with brackets, as taught by Shibata '966, to more securely mount the regulator assembly to the vehicle door.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Osborn et al. in view of Shibata '966 as applied to claims 12-16 and 24 above, and further in view of Yamamura et al.

Yamamura et al. discloses a regulator assembly comprising a timing belt having teeth and a sprocket wheel having complementary teeth. See column 11, lines 33-38.

It would have been obvious to one of ordinary skill in the art to provide Osborn et al., as modified above, with a timing belt, as taught by Yamamura et al., to provide a more reliable means for transmitting force between the motor and the glass support member.

Art Unit: 3634

Response to Arguments

Applicant's arguments filed June 24, 2002 have been fully considered but they are moot in view of the new grounds of rejection.

Conclusion

THIS ACTION IS NOT MADE FINAL.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory J. Strimbu whose telephone number is 703-305-3979. The examiner can normally be reached on Monday through Friday 8:00 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on 703-308-2686. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3597 for regular communications and 703-305-3597 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-2168.

A handwritten signature in black ink, appearing to read "Gregory J. Strimbu", with a long horizontal flourish extending to the right.
